PROFESSIONAL SUMMARY

Senior Front-End Developer with 5+ years of experience building responsive, high-performance, accessible web applications with React.js, Next.js, JavaScript (ES6+) and TypeScript. Hands-on with Next.js across both the Pages Router and the App Router, including SSR, SSG, ISR and React Server Components, plus GraphQL and REST API integration, and building reusable UI components within a design system and shared component library documented in Storybook using Tailwind CSS and Material UI.

Proven track record in front-end performance optimization (~40% faster page loads through code splitting, lazy loading and bundle optimization), automated testing with Jest, React Testing Library and Playwright (90%+ coverage), cross-browser compatibility and web accessibility (WCAG). Experienced in building internationalized (i18n), multi-language interfaces. Collaborates closely with product, design and back-end teams to turn requirements and Figma UI designs into polished, production-ready features. Based in Dubai and available to join immediately.

CORE TECHNICAL SKILLS

Front-End: React.js, Next.js (App Router, Pages Router, React Server Components, SSR, SSG, ISR), JavaScript (ES6+), TypeScript, HTML5, CSS3, Angular

Styling & Design Systems: Tailwind CSS, SCSS, Material UI, Bootstrap, Design System, Shared Component Library, Storybook, Component-Driven Development, Figma

APIs & Data: GraphQL, REST APIs, Async Programming, JWT Authentication, Protected Routes, Node.js (Basic)

State Management: Redux, Context API

Performance: Front-End Performance Optimization, Core Web Vitals, Code Splitting, Lazy Loading, Memoization, Virtualization, Client & Server-Side Pagination, Chrome DevTools, Lighthouse

Testing & Quality: Jest, React Testing Library, Playwright (E2E / Regression), Jasmine, Karma, Unit & Component Testing, Code Reviews, ESLint, Prettier

CI/CD & Tools: Git, Git-based Workflows, GitLab CI/CD, Docker, AWS, Vite, Webpack

Practices: Internationalization (i18n), Localization, Responsive Design, Cross-Browser Compatibility, Web Accessibility (a11y, WCAG), Agile/Scrum, Technical Documentation

PROFESSIONAL EXPERIENCE

Software Engineer (Front-End) | Impelsys Private Limited — Bangalore, India | Jun 2019 – Dec 2024

Adaptive Learning Platform

Built and maintained scalable, high-performance web applications using React.js, Next.js and TypeScript, turning product requirements and Figma UI designs into responsive, accessible, production-ready features.

- Developed reusable UI components for a shared design system / component library with Tailwind CSS and Material UI, documented in Storybook, improving UI consistency and maintainability across modules.
- Integrated REST APIs to power dynamic, data-driven interfaces, handling loading, error and empty states.
- Built Next.js features across both the Pages Router (SSR/SSG/ISR) and the App Router (React Server Components, nested layouts, server and client components).
- Used Incremental Static Regeneration (ISR) and server-side rendering to balance content freshness with fast page loads and SEO.
- Reduced page load times by $\approx 40\%$ through code splitting, lazy loading, bundle optimization, memoization and rendering improvements, profiled with Chrome DevTools and Lighthouse against Core Web Vitals.
- Implemented internationalization (i18n) for multi-language interfaces, externalizing UI strings and handling locale-aware formatting of dates and numbers.
- Optimized rendering of large, data-heavy lists using virtualization and client/server-side pagination, improving scroll performance and reducing memory usage.
- Implemented token-based authentication (JWT), protected routes and session handling to secure user data.
- Managed complex application state with Redux and Context API for predictable data flow across modules.
- Achieved 90%+ test coverage with unit and component tests in Jest and React Testing Library; upheld code quality through code reviews, ESLint/Prettier and CI checks.
- Improved web accessibility (a11y) with semantic HTML, keyboard navigation and WCAG-aligned reusable components; ensured cross-browser compatibility across desktop and mobile.
- Troubleshooted and debugged interface and application issues across browsers and devices using Chrome DevTools, network/API inspection and state analysis.
- Contributed to CI/CD pipelines using GitLab CI, Docker and AWS within Git-based workflows.
- Collaborated with product managers, UX designers and back-end engineers in Agile/Scrum, reviewing requirements and surfacing edge cases and accessibility considerations early.

Technologies: React.js, Next.js (App Router, Pages Router), React Server Components, TypeScript, JavaScript (ES6+), Tailwind CSS, Material UI, Storybook, REST APIs, i18n, Redux, Context API, Jest, React Testing Library, Docker, GitLab CI/CD, AWS

Neonatal eLearning Platform

- Developed responsive, accessible UI components with Angular and Angular Material from functional requirements and design specifications.
- Reduced response latency by $\approx 30\%$ through API optimization and efficient rendering strategies.
- Refactored legacy JavaScript/jQuery modules into maintainable, component-based Angular architecture.

- Integrated REST APIs and handled asynchronous data, loading states, validation and error scenarios.
- Built E2E and regression test suites with Playwright alongside unit tests in Jasmine and Karma; performed cross-browser testing and debugging.
- Contributed to CI/CD pipeline improvements using Docker and GitLab CI.

Technologies: Angular, TypeScript, HTML5, CSS3, Angular Material, Bootstrap, REST APIs, Playwright, Jasmine, Karma, Docker, AWS

Professional Development & Upskilling | Jan 2025 – Present

- Completed AI foundations training covering generative AI, large language models (LLMs) and prompt engineering, and how AI capabilities can be applied in modern web products.
- Deepened expertise in the latest React and Next.js features, including App Router patterns, React Server Components and modern data-fetching and rendering strategies.

EDUCATION

Bachelor of Engineering — Computer Science & Engineering | LBS College of Engineering, Kasaragod, India | 2013 – 2017

ADDITIONAL INFORMATION

Location: Dubai, UAE (Visit Visa) — available immediately; employer visa sponsorship required

Languages: English (Fluent), Malayalam (Native)

Nationality: Indian
